Bubble Level Pro is a free Tools app. It's easy to download and install it to your mobile phone. Please note that ApkPiz only shares native and free apk installers for Bubble Level Pro 8.0.2 APK without any modifications. The average rating is 4.60 out of 5 stars in the playstore. If you want to learn more about Bubble Level Pro then you can visit the SARL PixelProse support center for more information All & applications; The games here are for home or personal use only. If any apk download infringes your copyright, please contact us. Bubble Level Pro is a real estate and trademark from PixelProse developer SARL. The level of spirit, bubble levels or simply a level is an instrument designed to indicate either a horizon surface (level) or vertical (pipe). Different types Bubbles can be used by carpenters, stonemasons, bricks, other building trade workers, surveyors, millwrights and other metal workers, and in some photographic or videographic work. Hold any of the four phones against objects to test it for levels or pipes, or place them on a flat surface for levels of 360°. • No permission is required at all• No advertisement • Calibrates any party independently• Recharge relatively (surface of other objects) or really (earth gravity)• Show degree angles, tendency in percent, roof pitch or inch per leg (:12)• Sound effects to calibrate without seeing the phone • Install on SD• Orientation lock Show More © 1996-2014 , Amazon.com, Inc. or its affiliate Bubble Level application also has a bull's eye level meter which is a circular, an average device with liquid under the face of a little glass convex with a circle in the center. It works to flatten the surface across the plane, while the tube level only does so towards the tube. The Bubble Level app tries to mimic the actual level of the cow's eye and displays the data as the actual bull's eye level meter will. Where can you use Bubble Levels? Bubble levels are usually used in construction, carpets and photography to determine whether the object is where you work at a level. Used correctly, bubble levels can help you make perfect pieces of furniture, help you when hanging drawings or other stuff on the walls, level billiard tables, table tennis levels, setting up tripods for pictures and more. It must have a device for any house or apartment. Your device should be calibrated by the manufacturer. If you believe it's wrongly calibrated, you can re-scan your device by opening calibration, putting your device screen facing to the perfect level surface (such as your room floor) and press SET. Press RESET to return to your device's default factory calibration. View Bubbles: The standard bubble level you're using. Horizontal View: Horizontal lines turn as you rotate. Enable the camera features in this view to remotely flatter things. Flat View: Placing a phone on the surface activates this view where the optional beep can show how the surface level is without having to look at the screen. New features and functions and UNIK:1. Alignment of objects2. Angle measurement3. Surface of the flatness4. Inclinometer - Also known as tilt - meter, will assist drivers while travelling off-road, to control and minimize the risk of roll-over. With all the new features of the app, you'll always have a carpenter and off-road steering with you! From now on, with the help of Bubble Levels, you won't have a problem about: Picture alignment, boards, furniture, walls etc! • Calculation of different angles in various situations• Check the table, shelves and surface level of each face object • Detect bicycle tendencies, cars, etc. This is a major occasion of app usage, but you'll find MORE practices! spirit, bubble stage or simply stage is an instrument designed to show if the surface is flat (stage) or vertical (paip). Various types of bubble levels can be used by carpenters, stonemasons, stonemasons, other building trade workers, surveyors, millwrights and other metal workers, and in some photographic or videographic work. Hold any four sides of the phone against an object to test it for levels or pipes, or place on a flat surface for 360° levels. • Calibrate any party independently • Calibrates relatively (other object surfaces) or truly (earth gravity) • Show degree angles, tendencies in percentage, roof pitch or inch per leg (:12) • Sound effects to calibrate without seeing the phone • Install on the SD • Orientation locks What's New: Fix the display orientation slope Add support for the latest Android phones. The application does not have Screenshots Downloads Bubble Level Pro v8.0.2 [Paid] APK/Old Version mirror Bubble Level Pro v8.0.0 [Paid] APK/Related Mirror This is a free ad version (no advertisement) of my application: level of bubble, passion level or spirit is simply an instrument designed to show either the horizon surface The Bubble Level app is useful, accurate, easy to use and a very useful tool for your Android device. The traditional modern level meter has a slightly curveless glass tube filled with liquid, usually colored spirit or alcohol, leaving bubbles in a tube. At a slight tendency the bubble moves away from the central position, which is usually marked. The Bubble Level app tries to imitate the actual level meter and displays the data as a real level meter. The Bubble Level app also has a bull's eye level meter which is a circular, a flat bottom device with liquids under a slightly convex glass face with a circle in the center. It works to flatten the surface across the plane, while the tube level only does so towards the tube. The Bubble Level app tries to mimic the actual level of the cow's eye and displays the data as the actual bull's eye level meter will. Where can you use Bubble Levels? Bubble levels are usually used in construction, carpets and photography to determine whether the object is where you work at a level. Used correctly, bubble levels can help you create perfect pieces of furniture, help you when hanging drawings or other stuff on the walls, level billiard tables, table tennis levels, setting up tripods for pictures, trailer levels or your camp and more. It must have a device for any house or apartment. Your device should be calibrated by the manufacturer. If you believe it's wrongly calibrated, you can re-scan your device by opening calibration, putting your device screen facing to the perfect level surface (such as your room floor) and press SET. Press RESET return to the refinery determinant of your device.
